KAPPA SERIES | DUAL MOTOR

KAPPA 13

Two Motor Types. One Cabinet.

The Kappa runs **pusher lanes and coil lanes side by side on the same shelf**, so a bottle, a carton and a snack bag can each get the motor that suits them. Seven adjustable shelves carry 70 selections and roughly 420 to 560 units, and every vend is lowered by a vertical elevator with zero-drop delivery. Refrigeration from 4 °C to 25 °C (39 °F to 77 °F), an anti-ant isolation system, a 21.5" touchscreen, cashless payments, internal and external cameras and dual locking all come standard. The illuminated topper, a cash module and an ADA package are ordered as options.

Will It Dispense Your Product?

This is what makes the Kappa different. **Dual motor technology** lets pusher lanes and coil lanes live on the same shelf, so you are never forced to pick one mechanism for the whole cabinet. Lane width and shelf height are set to your pack and reconfigured on site, and every vend rides the vertical elevator down instead of falling.

ADJUSTABLE PUSHER LANES

A motorized pusher keeps every facing at the glass and advances the next unit on demand. Dense and repeatable, for cartons, boxes, bottles and anything with a flat, stable base.

MOTORIZED COIL DISPENSING

A coil turns one full revolution and releases exactly one unit. The classic mechanism, best for bagged snacks, sachets, pouches and light irregular packs a pusher cannot hold square.

VERTICAL ELEVATOR

The tray rises to the selected shelf, collects the item and lowers it to the pickup bin. Zero-drop delivery for glass, cosmetics and boxed electronics.
