ALPHA SERIES | HOT FOOD

ALPHA HOT FOOD

Cold Storage In. Hot Meals Out.

Alpha holds the food refrigerated at **4 °C to 25 °C (39 °F to 77 °F)**, then moves the selected item into a high-capacity **360° microwave oven** that heats it in approximately 50 seconds and hands it over ready to eat. Pizza, burgers, sandwiches, pre-cooked meals and baked goods each get their own heating profile. Seven shelves, 28 selections and up to 84 items, with conveyor lanes carrying every order to the oven and the delivery zone. A 21.5" touchscreen, cashless payments, LED lighting, a dual camera system, Real-Time Management and dual locking come standard.

Oven range	**220 °C to 360 °C (428 °F to 680 °F)**
Heating cycle	**Approximately 50 seconds, 360° rotation**
Profiles	**Individual profile per product**
Ventilation	**Rear clearance required**

SECURITY, FOOD SAFETY & ACCESS

KEYED SERVICE LOCK
Heavy-duty cam lock on the service door

ELECTRONIC LOCK
Independent coded lock as a second layer

COLD CHAIN HELD
Food stays refrigerated until the moment it is heated

Cold In, Hot Out, in Four Moves.

Hot food unattended only works if the cold chain holds until the last possible second and the heat is applied evenly. Alpha does both in one cabinet, and the customer sees none of it.

01

STORED COLD

Product sits refrigerated between 4 °C and 25 °C (39 °F and 77 °F) on seven adjustable shelves, loaded straight from your cold chain.

02

PICKED BY CONVEYOR

A motorized belt carries the item forward to the oven in a controlled transfer.

03

HEATED 360°

The oven runs the profile set for that product, 220 °C to 360 °C (428 °F to 680 °F), turning it through a full 360° for approximately 50 seconds.

04

DELIVERED READY

The finished item is delivered to the zone under the screen, hot and ready to eat.

CAPACITY & HARDWARE

Shelves	**7 adjustable**
Product selections	**28**
Max. units on board	**Up to 84 units**
Lane type	**Conveyor lanes**
Cabinet	**All-steel, insulated, modular shelf heights**
